

NETfinder

NETfinder is the latest generation of the LANtest family, with an advanced circuit design surpassing the original technology, NETfinder is the perfect companion to network professionals and students, for commercial and residential applications.

NETfinder is designed to enhance users' ability to quickly locate and verify the status of common and standard voice and data cables. It combines the functions of a convenient cable tester with a built-in low emission frequency "TONE" generator.

NETfinder is also equipped with Port-finder function to trace a cable back to the 10/100M hub/switch. With NETfinder, cable tracing and testing is now ONE easy step.

Features

- All-in-one: Tester, tone generator, and port-finder
- Compatible with most cable tracers on the market
- Pin-to-pin LED indicators
- Local loop back test, open, shorts, miss-wire
- Remote terminator for testing pre-installed cables
- Auto-scan or manual step testing in forward, backward and stop sequences
- Accessories to test video (F connector) and RJ-11 telephone cable
- Port-finder function to locate corresponding socket on 10/100M hub/switch

Specifications

- Model No.: 256553
- Display: LED
- Connector type: RJ-45
- Operating temp.: 0 to 40°C
- Storage temp.: -20 to 60°C
- Humidity: 95% relative humidity (non-condensing)
- Master weight: 124 x 55 x 30mm
- Remote weight: 29 x 55 x 22mm
- Power source: 1.5V AAA x 4
