

LANID & LANID Pro a comprehensive tool for LAN installation and troubleshooting

The LANID is an essential tool for verifying and troubleshooting local area networks. It is designed for network administrators to quickly diagnose problems during LAN installation and repair. With a simple push of a button, the LANID will display the status of network devices, whether it is running a 10 BASE-T or 100 BASE-T network.

Furthermore, the LANID Pro has the same features as the LANID and is also equipped with a port-finder function to quickly identify the corresponding port location on the switch/hub. The compact design provides the user with optimum convenience and portability.

Auto-negotiation with devices:

LANID features the ethernet standard “auto-negotiation” function to obtain the operating speed for LAN devices. The “auto-negotiation” function provides automatic speed matching for multi-speed devices, allowing devices to configure to the best possible mode of operation over a link.

Therefore, the LANID is not only can the LANID determine the speed of a given device; it can also resolve the devices link status.

Port-finder:

The port-finder feature sends discontinuity auto-negotiation signal to communicate with 10/100M hub/switch. The corresponding LED indicator on 10/100M hub/switch panel will blink.

Features

- Comply with IEEE802.3 ethernet standard PHY in high speed auto communication protocol
- Power auto off function can reduce battery power loss
- Display current on-line status by LED
- RJ-45 connector can be connected with standard network equipment
- Easy to carry and use with pen style design
- Identifies the port speed up to 100.
- LANID Pro with port-finder function to sends discontinuity auto-negotiation signal to communicate with 10/100M hub/switch.

Specifications

- Model No.: 256655, 256655Pro
- Port type: RJ-45
- Battery: 1.5VAAA x 2
- Display: LED Instructions
- Dimensions: 215 x 38 x 36mm
- Weight: 106.3g
- Operating temp.: 0°C to 70°C (32°F to 158°F)

Order information

256655 LANID LAN Device status identifier

256655Pro LANID Pro with port-finder function
