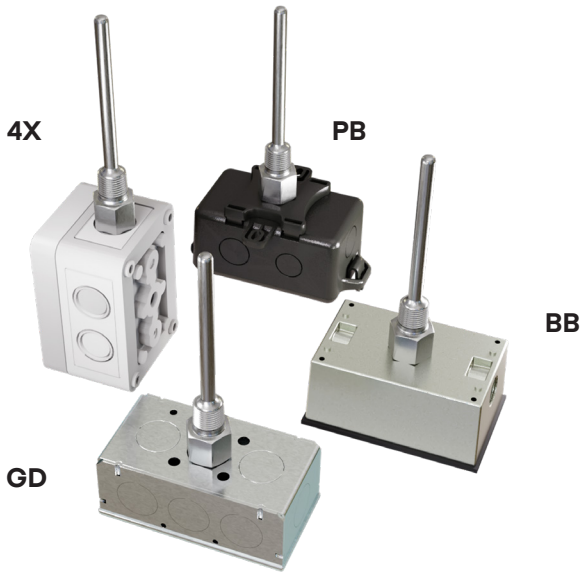
Immersion Series | Thermistor

Stainless Steel Immersion, Thermistor

Automation Components
a DwyerOmega brand

The ACI Thermistor Immersion Series features a 6.35 mm (¼ in) diameter stainless steel probe with two, 35.6 mm (14 in), 0.65 mm (22 AWG) Etched Teflon colored lead wires depending on the probe length ordered to differentiate the different sensor types. The sensors in this series are manufactured using ACI's proven double encapsulation process to eliminate the effects of moisture and to increase the response times using our high quality, thermally conductive epoxy. The immersion sensors include a welded thermowell "-I" version but can be ordered without the welded thermowell "-INW" version. The "INW" version includes a standard ½ in NPS Male process thread to be used with an optional machined thermowell or in an existing thermowell application. Optional NEMA/IP rated enclosures and NIST certificates are available the back of the product data sheet.



Applications

Chilled Water Systems, Hot Water Systems, Boilers, Pumps, Compressor, Chillers

Warranty

The ACI Thermistor Immersion Series is covered by ACI's Five (5) Year Limited Warranty. The warranty can be found in the front of ACI's Sensors & Transmitters catalog, as well as on ACI's website.

Disclaimer: Specification of any thermowell and the materials of construction are the sole responsibility of the designer of the system that incorporates the thermowell. Sole responsibility for ensuring compatibility of the process fluid with the system rests with the end user.
