Immersion Series | Platinum RTD

Stainless Steel Immersion, Platinum RTD

Automation Components
a DwyerOmega brand

The ACI Platinum Immersion Series features a stainless steel probe with Etched Teflon colored lead wires to differentiate the different sensor types. The three-wire "-3W" option should be ordered when using with a 3-Wire temperature transmitter or sensor configuration on your building management system or PLC (Programmable Logic Controller). The purpose of the 3rd wire is to compensate for external lead wire resistance that affects the sensor output. ACI recommends the use of 1.02 mm (18 AWG) lead wires to reduce the external lead wire resistance when using a Platinum RTD. The sensors in this series are manufactured using ACI's proven double encapsulation process to eliminate the effects of moisture upon the sensors and to increase thermal response times using our high quality, thermally conductive epoxy. The immersion sensors "-I" include a welded thermowell but can be ordered without the thermowell "-INW" version. The "-INW" includes a standard ½ in NPS process thread to be used with an optional machined thermowell or an existing thermowell application. Optional NEMA/IP rated weather proof enclosures and NIST Certificates are available as referenced on this product data sheet.

Applications

Chilled Water Systems, Hot Water Systems, Boilers, Pumps, Compressors, Chillers, Cooling Towers

Warranty

The ACI Platinum Immersion Series is covered by ACI's Five (5) Year Limited Warranty. The warranty can be found in the front of ACI's Sensors & Transmitters catalog, as well as on ACI's website.

Disclaimer: Specification of any thermowell and the materials of construction are the sole responsibility of the designer of the system that incorporates the thermowell. Sole responsibility for ensuring compatibility of the process fluid with the system rests with the end user.

Specifications

Sensor Type: Platinum RTD

Sensor Curve: PTC (Positive Temperature Coefficient)

Number Sensing Points: One

Number Wires

A/100-2W-I Series and **A/1K-2W-I Series:** Two (Non-Polarity Sensitive)

A/100-3W-I Series and **A/1K-3W-I Series:** Three (Polarity Sensitive)

Sensor Output at 0 °C (32 °F)

A/100-xW-I Series: 100 Ω nominal
A/1K-xW-I Series: 1000 Ω nominal

Sensor Accuracy 0 °C (32 °F): ±0.06 % Class A (**Tolerance Formula:** ± °C = (0.15 °C + (0.002 * ltl)) where ltl is the absolute value of Temperature above or below 0 °C in °C)

-40 °C (-40 °F): ± 0.23 °C (± 0.414 °F)
0 °C (32 °F): ± 0.15 °C (± 0.27 °F)
200 °C (392 °F): ± 0.55°C (± 1.00 °F)

Din Standard: DIN EN 60751 (IEC 751)

Temperature Coefficient: 3850 ppm / °C

Sensor Stability: ± 0.03% after 1000 Hours at 300 °C (572 °F)

Response Time (63 % Step Change): 8 seconds nominal

Self-Heating | Maximum Operating Current

100 Ω RTD: 7 mW / °C (Still Air) | 5 mA
1 kΩ RTD: 4 mW / °C (Still Air) | 3 mA

Sensor Operating Temperature Range: -40 °C to 200 °C (-40 °F to 392 °F)

Enclosure Specifications (Temperature, Flammability, NEMA/IP Ratings)

"-GD" Enclosure: Galvanized Steel, -40 °C to 121 °C (-40 °F to 250 °F), NEMA 1 (IP10)

"-PB" Enclosure: ABS Plastic, -30 °C to 100 °C (-22 °F to 212 °F), UL94-5VB, Plenum Rated

"-BB" Enclosure: Aluminum, -40 °C to 121 °C (-40 °F to 250 °F), Plenum Rated, NEMA 3R

"-4X" Enclosure: Polystyrene Plastic, -40 °C to 70 °C (-40 °F to 158 °F), UL94-V2, NEMA 4X (IP 66)

Storage Temperature Range: -40 °C to 85 °C (-40 °F to 185 °F)

Operating Humidity Range: 10 % to 95 % RH, non-condensing

Probe Diameter: 6.35 mm (0.25 in)

Thermowell Bore Diameter: 6.6 mm (0.26 in)

Probe Material: 304 Stainless Steel

Thermowell Material: 304 Stainless Steel

Thermowell Instrument: ½ in NPS (National Pipe Straight) Female Thread

Process Thread Size: ½ in NPT (National Pipe Tapered) Male Thread

Fitting Material | Flammability Rating: Polyamide 66 (High Performance Nylon 66) | UL94-HB

Fitting Thread Size: ½ in NPS (National Pipe Straight) Male Thread

Foam Pad Material | Flammability Rating: Neoprene/EPDM/SBR Polymer | UL94-HBF; FMVSS-302; MIL-R-6130C
