# **Megger**

One Touch OLTC with the TTRU3

Completing turns ratio tests on all transformer taps can be a cumbersome process. With One Touch OLTC from the TTRU3, anyone can configure and test all taps within a few short minutes. See for yourself here!

1. Select Start and End Tap

2. Configure Tap Changer

3. Start!

Pulse = Tap Changer Contact close time
Wait = Time to complete tap change

After clicking start, the first tap will be tested. When complete, the tap will be changed and the next tap will be tested automatically! A graph is displayed for the remaining taps and testing will stop when the last tap is tested or % error limit has been exceeded.
