OUR COMMITMENT WITH OUR MADE IN THE USA COLLECTION

For more than 100 years, IDEAL® Electrical has had a proud history of producing the highest quality tools by marrying innovation with tradition. It's that American ingenuity that runs through everything we do, especially our commitment to producing tools here, a hallmark of our "Made in the USA" collection.

It's not just about making high quality tools, it's about making them the right way; with American steel and American labor, right here in the USA. Look for our Made in the USA badge for tools that are American through and through.

UNMATCHED QUALITY

These products, proudly produced in the USA, have been supplied to the government and armed forces for decades where they are routinely used in some of the harshest environmental conditions. We believe that when Americans need tools they can rely on, those tools should be American-made.

BUILDING OUR COMMUNITIES

Not only do we build the tools that build our world, but we are unceasing in our support for community on a local level; union and non-union from trade schools to professional organizations. We support this industry and are committed to keeping and creating more American jobs because of it.
