SPIRAL STEP BITS

The IDEAL® line of spiral step bits enables you to save time with titanium nitride spiral cutting action. Each step has a gradual relief that eases into each cut reducing the need to change drill bits. This provides an economical way to save you valuable time on the project.

Manufactured out of M35 High Speed Steel with Cobalt, providing strength and durability, the bit design has balanced hardened edges and ¼" hex shank that makes them compatible not only with cordless drills but also optimized for impact drivers.

The split point tip eliminates the need for a starter pilot hole and minimizes walking on the material for quick startup on any project. Titanium nitride coating lowers the cooling time, extending the life for repetitive drilling through the toughest of materials. IDEAL® Step Drill bits feature a spiral cutting action providing faster chip removal, less vibration and faster drilling rate which minimizes binding while drilling.

Individual Step Drill Bits

Product Offering

#	Drill Diameter	No. of Steps	Step Increments	Step Thickness	Part No.
1	⅛" to ½"	13	⅛"	⅛"	36-701
3	¼" to ¾"	9	⅛"	⅛"	36-702
4	⅜" to ⅞"	12	⅛"	⅛"	36-703
5	¼" to 1"	13	⅛"	⅛"	36-704
9	¼" to 1-⅛"	15	⅛"	⅛"	36-705
6	¼" to 1-⅜"	15	⅛"	⅛"-¼"	36-706

4-Piece Kit

- 4-piece kit includes sizes:
 #1 (1/8"-1/2") (36-701)
 #4 (3/16"-7/8") (36-703)
 #9 (1/4"-1-1/8") (36-705)
 #46 (1/4"-1-3/8") (36-706)
- Rugged, durable molded plastic case with metal latch

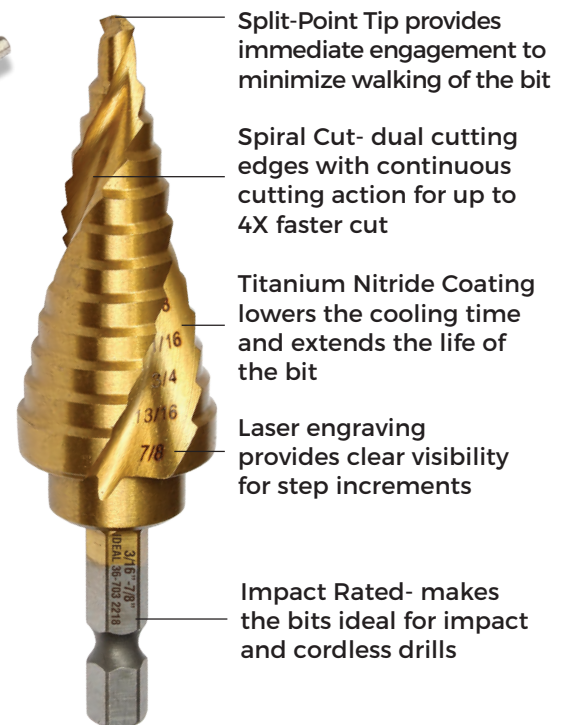

Description	Part No.
Spiral Step Bit Kit	36-700

For optimal performance:

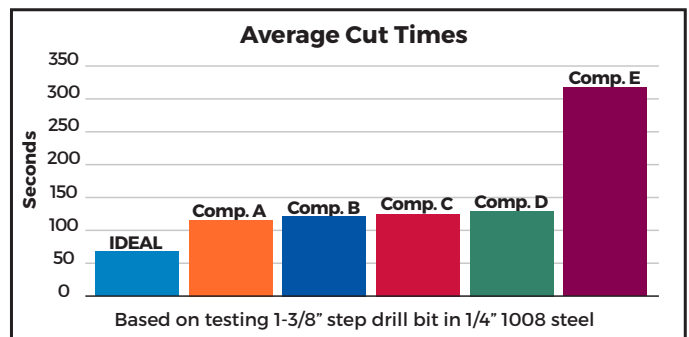

- Recommended RPM for step drill bits ≤ 7/8" 650 RPM
- Recommended RPM for step drill bits > 7/8" 470 RPM

⚠ WARNING Electrical and eye injury hazard. Contact with live voltage may cause injury or death. Do not use on or near live voltage. Wear eye protection.

Up to 4X Faster than the Competition

Rated up to 8 gauge mild steel, aluminum, copper, brass and plastic.
