
HIGH FLEXIBILITY FISH TAPES

Non-Conductive Triple Strand Polyester
Increases Durability and Strength

HIGH FLEXIBILITY FISH TAPES

Klein Tools 75-foot and 150-foot High Flex Polyester Fish Tapes are the perfect wire pulling solution where flexibility meets strength. The non-conductive polyester material provides a highly flexible and lightweight tape compared to steel while the triple strand design delivers increased durability and strength compared to fiberglass. The low friction case and optimized feed angle create a smooth payout and easy retraction. The bright orange strand woven into the triple strand improves visibility for easier locating of the tape.

NON-CONDUCTIVE TRIPLE STRAND POLYESTER IS:

4X MORE FLEXIBLE THAN FIBERGLASS*

8X MORE FLEXIBLE THAN STEEL*

*Compared to Klein fiberglass and steel models.

Bright orange strand woven in provides increased visibility in low-light

Optimized feed angle decreases payout effort and allows for easier rewind

Polypropylene case and handle offer high impact resistance

Cat. No.	UPC 0-92644+	Description	Package Quantity	Material	Tape End	Weight
50375	50375-7	75-Foot High Flex Polyester Fish Tape	3	Polyester	Nylon Eyelet	3.5lb
