NFC™ Quick Start Guide

NFC™ (near field communication) is a method for wireless exchange of data over short distances between two electronic devices. NFC™ is integrated in most smartphones / tablets and in some of INOR's products. With this technology it is possible to wirelessly configure your transmitter.

Here is a quick guide to get you started.

1. Download the app INOR Connect.

2. Make sure NFC™ is turned on on the smartphone.

3.

{Remove smartphone case}

4.

**N**[®] NFC

{NFC™ is located in different places on different models of smartphone}

5.

**N**[®] NFC

{NFC™ is located in the middle of INOR transmitters}

6.

{NFC™ works best 2 cm or less between the two devices}

7. Configure the transmitter in three easy steps

1. Read the configuration of the transmitter
2. Configure your transmitter through the user friendly interface
3. Write the configuration to the transmitter
