13-INCH LONG REACH PLIERS

The Klein Tools 13-Inch Long Reach Pliers and Bent Nose Pliers are designed to improve access into tight spots across a variety of applications. The 2:1 double rivet design allows the jaws to open faster than the handles, ensuring the ability to grip on a workpiece without obstruction. This includes both straight (Cat. No. 71400) and bent jaw pliers (Cat. No. 71401), with Klein's unique angled knurls to provide an extra grip that limits slippage.

Extended 13" reach provides optimal access to tight spaces

Durable alloy steel for reliable performance and long-lasting use

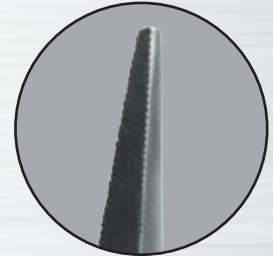

71400

Ergonomic molded grips ensure a secure, slip-resistant hold for comfort and precise control

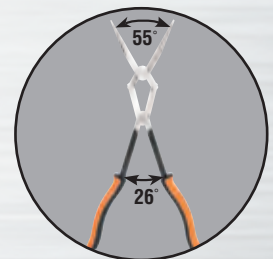

Needle nose design for precision in tight spaces

71401

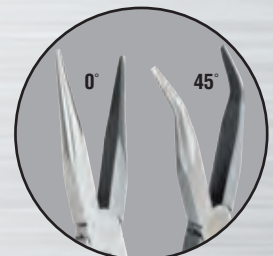

Bent nose design for working around obstructions

Angle knurled jaws deliver **2.5X** more grip than leading competitor for superior control*

2:1 double rivet design opens jaws twice as wide as handles for unmatched reach in tight spaces

Available in 2 styles:
Straight nose (71400)
and Bent nose (71401)

For Professionals
