LINEMAN'S HAMMERS

The Klein Tools Lineman's Hammers feature two tools in one with the built-in J-hook remover. Both rugged hammers are well-balanced, with the weight to drive lag bolts. The forged, tempered-steel heads are only 3-3/4-Inch (95 mm) long for use in tight areas. The Double-Face Hammer (Cat. No. 80936) has identical faces with 1-3/4" (4.5 cm) round-crown driving surface and beveled edges. The Milled-Face Hammer (Cat. No. 80936MF) has one milled-face for driving staples and common, unhardened nails while the other side is smooth for driving heavy-duty hardware.

**BUILT-IN J-HOOK
REMOVER**

DOUBLE-FACED HAMMER

80936

Smooth-face side
for driving
heavy-duty
hardware

Overstrike protection
increases durability
and longevity of
the hammer
