"World Class Quality"

93105 DEEP VACUUM ISOLATION VALVE ASSEMBLY KIT

SPECIFICATIONS:

- 3-way ball valve with independent valves to isolate two of the ports
- 1/4" Flare Male and Female Ports on Each End
- 1/4" Flare Male Side Port
- Working pressure up to 600 PSI
- Adapters Included:
 - 90° Elbow, 1/4 Flare Male to 1/4 Flare Female
 - 90° Elbow, 1/4 Flare Male to 5/16 Flare Female
 - Straight Adapter, 3/8 Flare Male to 1/4 Flare Female

TAKE CONTROL OF YOUR VACUUM SYSTEM

Isolating a vacuum gauge? No problem! This innovative valve offers independent control for both side and end ports, making it perfect for:

- **SAFE VACUUM GAUGE ISOLATION:** Work on your system with confidence. Isolate the vacuum gauge with the dedicated side port valve.
- **STREAMLINED LEAK CHECKS:** Close the end port valve after vacuuming, then open the side valve for a quick and easy leak check.

Unmatched Versatility:

- **3-WAY FUNCTIONALITY:** The independent valves allow for a true 3-way operation, ideal for diverse applications.
- **HIGH-FLOW, LOW-RESTRICTION:** Large ports and high-flow ball valves minimize restriction, ensuring optimal system performance.
- **ADAPTABLE DESIGN:** Includes adapters for seamless integration with most HVAC systems.

This innovative valve goes beyond isolation. Its versatility and functionality make it an essential tool for any technician's toolbox.
