Handheld Odor Meter

Highly Sensitive, 3 Models Available for Various Applications

Handheld Odor Meter is the most popular simplified tool for odor analysis, which indicates the relative strength and odor classification numerically by comparing the odor gas and purified air.

Applications

OMX-SRM

- Finding odor source at factories, incinerator, plants, or effluent treatment facility

OMX-ADM

- Evaluation for deodorizing at hospitals or nursing homes
- Suitable for putrid odor such as ammonia

OMX-TDM

- TVOC measurement for monitoring IAQ condition

Features & Benefits

- Numerical value for relative strength of smell
- Numerical value for classification of smell
- Handheld Odor meter is ideal for "Before and After" applications, such as air purification and cleaning service.
- Battery operated with 7 hrs continuous usage

Real-time sampling mode displays odor change continuously

Memory sampling mode saves data based on the selected sampling rate.
