

PA4124 ADJUSTABLE TORQUE DRIVER

The PA4124 Adjustable Torque Driver from Tempo Communications is an essential tool for ensuring precise torque control in a variety of applications. It is commonly used in electrical, telecommunications, and data networking installations to ensure that connections are secure without over-tightening, which can damage components. Additionally, it aids in meeting industry standards and specifications, reducing the likelihood of errors and enhancing the overall quality and longevity of the installations.

Specifications:

- Accuracy: $\pm 4\%$
- Factory calibrated to ensure precision.
- Torque driver ranging from 0-40 inch-pounds of force.
- Rugged blow mold case to keep all components together making transportation easier.
- Great range of different style of bits to choose from.
- Magnet built into the driver to pick up screws.
- Easy to use twist adjustment for changing torque ranges.

Included Bits:

- T-10 Torx
- T-15 Torx
- T-25 Torx
- 3/16" Flat
- 1/4" Flat
- PH1 Phillips
- PH2 Phillips
