

PR650 Motor and Phase Rotation Tester

Determines correct phase wiring sequence and non-contact (wireless) motor rotation direction

Features:

- Determines correct phase wiring sequence (L1/A, L2/B, L3/C) for 3-phase system installations
- LEDs display phase direction (clockwise/counterclockwise) and which phases are live
- Contact or non-contact (wireless) motor rotation direction indicator
- Includes test leads with large color-coded alligator clips, soft case, and 9V battery
- CAT IV-600V
- 2 year warranty

Applications:

Determine correct wiring sequence for 3-phase systems

Determine correct rotation for 3-phase motors to prevent equipment damage

Specifications

Phase Voltage Range	120 to 400V AC
Bandwidth	2 to 400Hz
Motor Rotation	Yes (contact and wireless)
Power	9V battery
Safety Category	CAT IV 600V
Dimensions	5.3 x 2.9 x 1.2(135 x75x31mm)
Weight	6.1oz (174g)

Ordering Information:

PR650 Motor and Phase Rotation Tester

**CAT IV
600V**

RoHS **CE**
