WHO WE ARE

ABOUT TREND NETWORKS

OUR STORY

TREND Networks (formerly IDEAL Networks) manufactures a leading range of network and cable test equipment, with expert teams supporting customers all over the world.

Whether you're a network technician, systems integrator, or cable installer, at some point, you'll run into a problem on site. This is when you can Depend On Us most.

Every day, the TREND Networks team is committed to exceeding expectations, even in difficult circumstances. Going above and beyond to support our customers is in our DNA. Our deeply ingrained 'Depend On Us' philosophy ensures that our customers know we will always provide the performance and support they need to be productive. Read more about Our Promise.

At TREND Networks, we believe in partnerships, with our suppliers, employees, and our customers. We understand that there is no 'one size fits all' approach. By taking the time to listen to what our customers need, we can provide frictionless, flexible solutions to specific challenges. The result? Long term partnerships that help businesses all over the world to grow and evolve.

From our UK headquarters to our international offices, our culture of innovation enables us to set an industry leading pace. Using decades of industry experience, we bring to market a wide range of up-to-date and dependable test equipment that delivers the fast, accurate results that help our customers to get the job done.

Our key solutions include cable certifiers, data cable testers, cable verifiers, cable qualifiers, fiber cable testers, active network testers, network transmission testers, PoE testers, CCTV testers, bandwidth testers, industrial Ethernet testers, and more. Plus, technical support, training, service, calibration, educational resources, and advice.

VISION

“To Empower the Connected World”

OUR PROMISE

YOU CAN **DEPEND ON US**

At TREND Networks we know that you need to be confident that our data cable and network testing equipment provides fast, accurate results in all circumstances - even the most difficult ones.

UNLIKE WITH OTHER SUPPLIERS, WITH TREND NETWORKS YOU CAN ALWAYS:

DEPEND ON OUR EQUIPMENT

Our Lifetime Support Promise means we will continue to calibrate and repair the cable and network testing equipment you buy from us for as long as you use it. If we are ever unable to source replacement parts for older products, we'll offer up to 30% discount off the latest generation.

DEPEND ON OUR DATA

The TREND AnyWARE Cloud ecosystem is the only system providing testing for cable certification, active network troubleshooting and bandwidth testing. As you grow, or as technology changes the TREND AnyWARE Cloud keeps you covered.

DEPEND ON OUR SUPPORT

Our Rapid Resolution service means that, if we cannot answer your call immediately we strive to return ALL technical support calls within 2 business hours. Our unique 'Real Time Troubleshooting' technology enables instant remote access to your tester anywhere in the world to resolve problems fast maximizing workforce productivity. To reach Tech Support call our Tech Hotline: +44 (0)1494 486432.

Visit our website for full terms and conditions.

VDV II

VOICE, DATA AND VIDEO CABLE VERIFIER

More than just a wiremapper

The VDV II Series are easy to use cable testers that check the integrity of copper cables commonly found in domestic, commercial or industrial voice, data or video installations.

Employing state-of-the-art technology, VDV II offers functionality not previously available in a wiremapper.

FEATURES

- RJ45, RJ11/RJ12 and coax ports
- TDR technology pinpoints cable faults eliminating unnecessary guess work
- Ability to identify and trace cables with a compatible inductive tone probe (optional)
- PoE service detection with voltage information
- Support for all common LAN cables (TIA 568A/B wiring schemes)
- Large backlit screen provides instantaneous, easy to read test results
- Identifies analogue (PBX) and digital (ISDN) telephone services
- Displays network rate and duplex information
- Port blink to visually trace cable
- Voltage protection - cable testing disabled if >2V is detected

Part No.	Kit content
R158000	VDV II – Voice, Data and Video Cable Verifier. Includes 1 x tester, 1 x dual port remote unit, 1 x coax remote unit, 1 x alkaline battery, 1 x multi-language user guide
R158002	VDV II Plus – Voice, Data and Video Cable Verifier
R158003	VDV II Pro – Voice, Data and Video Cable Verifier

Additional content for VDV II Plus and Pro: Includes 1 x tester, 1 x dual port remote unit, 1 x coax remote unit, 1 x alkaline battery, 1 x multi-language user guide, 2 x RJ45 to alligator clip cable 390mm, 2 x screened RJ45 to RJ45 cable 150mm, 2 x RJ12 to RJ12 cable 100mm, 1 x F-type plug to F-type plug cable 230mm, 1 x F-81 barrel splice, 1 x BNC female to F-type male adapter, 1 x BNC female to F-type female adapter, 1 x RCA female to F-type male adapter, 1 x RCA female to F-type female adapter, 1 x wallet wiring card, 1 x carry case

Part No.	Recommended Accessories
158050	Kit of 12 x RJ45 remote units (#1 - #12)
158051	Kit of 24 x RJ45 identifiers (#1 - #24)
158053	Kit of 12 x coax remote units (#1 - #12)
R180001	1 x TREND amplifier probe

Description is for VDV II Pro model.

For features of VDV II Plus and VDV II, please visit www.trend-networks.com

PoE Pro

DATA CABLE AND POWER OVER ETHERNET VERIFIER

Eliminate guesswork from PoE installations

The PoE Pro eliminates guesswork when installing, maintaining and troubleshooting networks where PoE is deployed.

Test results are stored in real-time on the free AnyWARE Cloud mobile app and are seamlessly uploaded to AnyWARE Cloud where professional PDF reports are generated.

The PoE Pro identifies the Class of the PoE source and power available to a PoE device regardless of cable length, cable quality or other factors. Provides a clear pass/fail result to IEEE 802.3af/at/bt standards.

FEATURES

- **AnyWARE Cloud** connectivity and reporting via the AnyWARE Cloud app
- **Multimedia Support:** RJ-45, RJ-11/RJ-12 and coax ports for verification of low voltage copper cables
- **TDR Length Testing and Troubleshooting:** Pinpoints cable faults eliminating unnecessary guesswork
- **Tone Generator:** Ability to identify and trace cables with a compatible inductive tone probe (optional)
- **PoE Detection:** Identify the IEEE standard, Class, Type, max Power (W) and Voltage (V) available
- **Large Backlit Screen:** Instantaneous, easy to read test results
- **Media Service Detection:** Identifies analog (PBX) and digital (ISDN) telephone services
- **Extended Power Test:** Some switches / injectors may provide power exceeding its IEEE Class rating. Hold button for 3 seconds to measure maximum available power up to 90 watts
- **Ethernet Detection:** Displays network rate and duplex information
- **Voltage Protection:** Cable testing disabled if >2V detected

Part No.	Kit Contents
R158006	PoE Pro — Data Cable and Power over Ethernet Verifier. Includes 1 x tester, 1 x dual port remote unit, 1 x coax remote unit, 1 x alkaline battery, 1 x multi-language user guide, 2 x RJ45 to alligator clip cable 390mm, 2 x screened RJ45 to RJ45 cable 150mm, 2 x RJ12 to RJ12 cable 100mm, 1 x F-type plug to F-type plug cable 230mm, 1 x F-81 barrel splice, 1 x BNC female to F-type male adaptor, 1 x BNC female to F-type female adaptor, 1 x RCA female to F-type male adaptor, 1 x RCA female to F-type female adaptor, 1 x wallet wiring card, 1 x carry case.
POEPRO-KIT	POEPRO-KIT - PoE Pro, 1 x Amplifier Probe for Data Cable Tracing, 24 x RJ45 identifiers (#1 - #24), 12 x coax remote units (#1 - #12) and 3 year warranty.
Part No.	Recommended Accessories
158050	Kit of 12 x RJ45 remote units (#1 - #12)
158051	Kit of 24 x RJ45 identifiers (#1 - #24)
158053	Kit of 12 x coax remote units (#1 - #12)
R180001	1 x TREND amplifier probe

SignalTEK CT

DATA CABLE TRANSMISSION TESTER

Proof of Performance

If you install or maintain data cabling, SignalTEK CT allows you to generate PDF test reports that prove installed links run at Gigabit Ethernet transmission rates.

SignalTEK CT also gives network owners the assurance that installed cabling will support bandwidth hungry services like VoIP, IP CCTV and video streaming following moves, adds and changes.

Download the FREE App today

TREND
AnyWARE
APP

FEATURES

- Fast Autotest provides proof of network performance in seconds
- Support for shielded and unshielded twisted pair cable including Cat 5e, Cat 6, Cat 6A and Cat 7
- Stores up to 5000 tests to accommodate even the largest jobs
- Identify and trace cables with a compatible amplifier probe (R180001)
- Automatic generation of PDF test reports makes documentation effortless
- Tests against IEEE802.3ab to assure cable performance against a recognised international standard
- No requirement for annual calibration reducing cost of ownership
- Field replaceable RJ45 contacts eliminate downtime from worn or damaged connectors

Part No.	Kit Contents
R156006	SignalTEK CT – Data Cable Transmission Tester. Includes 1 x display with touchscreen, 1 x remote, 2 x NiMH batteries, 2 x patch cables - 30cm, Cat 5e STP, 2 x power supply with EU/UK/US adapters, 1 x USB Wi-Fi adapter, 1 x user manual, 1 x carry case
Part No.	Recommended Accessories
150058	1 x RJ45 insert extraction tool, 10 x lifejack RJ45 inserts
151052	1 x Alkaline battery module
R180001	1 x TREND amplifier probe

For additional accessories, please visit www.trend-networks.com

FEATURING

NEW

INTRODUCING LanTEK IV-S

LanTEK IV-S

THE MOST POWERFUL AND FASTEST CERTIFIER WE'VE EVER MADE.

The LanTEK IV-S copper and fiber data cable certifier is the future of cable certification and testing. Saving you time it will test and save a Cat6A link in 7 seconds and certifies links up to Cat8.1 and Cat8.2, including TCL and Resistance Unbalance measurements.

FEATURES

7 Second Test Time – Test and save a Cat6A test within 7 seconds.

VisiLINQ™ increases productivity – VisiLINQ™ permanent link adapters present a new and unique way to test, everything you need to operate the certifier and verify the results in the palm of your hand.

Fastest Cloud test management software in the world - Uploading tests / generating reports is even faster.

No downtime or unexpected bills – The Sapphire Care Plan is designed to minimise down time, reduce the cost of ownership and protect against unforeseen repair bills.

Part No	Kit Contents

FiberTEK IV

FiberTEK IV adapters are used with LanTEK IV-S for fast and simple certification of high bandwidth single-mode and multimode fiber optic cabling including support for encircled flux testing.

R164008

FEATURES

- **Troubleshooting:** Red laser light source to visually pinpoint faults and locate fiber ports
- **Receive LED indicator:** Flashes red to warn of light from other sources, green when linked to FiberTEK IV
- **Certification:** Tier-1 certification of single-mode and multimode fiber optic cabling
- **Encircled Flux compliance:** Enables compliance to the 2016 fiber standards IEC 14763-3 and ANSI/TIA- 526-14-C (optional accessory – see back page for details)
- **Field calibration:** Allows 1 and 3 jumper field calibration methods to ensure accuracy and compliance to ISO/IEC and ANSI/TIA standards
- **Supports all common connector types:** SC, FC, ST adapters included. LC adapters optional
- **Simplified bi-directional measurements:** Eliminates process of manually merging directional tests into one record

TEST MANAGEMENT SOFTWARE

The AnyWARE Cloud Test Management Software is now the fastest in the World Uploading tests / generating reports is even faster

The TREND AnyWARE Cloud management system allows real time collaboration between Project Managers and Field Technicians. There is no need for Field Technicians to setup the LanTEK IV-S, Project Managers pre-configure the jobs and tests in the TREND AnyWARE Cloud, eliminating potential mistakes and compressing the time taken to prepare reports for customers and warranties.

Cloud software

- **Operates anywhere with a web browser** – TREND AnyWARE Cloud operates on a PC, Mac and tablet devices (Android and iOS)
- **Free storage** – No need for separate servers or backup systems.
- **Easy to find project files** – Attach all project files including cable layout drawings, videos, and photos into the TREND AnyWARE Cloud. Everything you need in one place.
- **Share reports easier** – Use TREND AnyWARE Cloud to share links to the test reports eliminating the need to manually email large attachments.
- **Reduce training time with WalkMe** – TREND AnyWARE Cloud is embedded with the WalkMe digital adoption platform providing proactive, step-by-step guidance on all key tasks.

- **Easiest project navigation with drag and drop in a Cloud solution** – Navigating between the building/room/cabinet/rack is easier than ever with collapsible folders.

Fleet management

- **Easily manage the certifier fleet** – Fleet manager allows you to see who has the certifier, when the software was last updated, calibration due date and when the results were last synced. Allowing you to manage tester downtime and ensuring results are transferred back to the office and not lost or deleted.

TREND AnyWARE Cloud Jobs screen

TREND AnyWARE Cloud Test Result screen

Real time collaboration between Project Managers and Field Technicians

Pre-configuration

- **Reduce setup errors** – Project Managers pre-configure all project information in the TREND AnyWARE Cloud and Field Technicians simply download the project to the LanTEK IV-S eliminating any mistakes from manual data entry.
- **Create the most complex test ids** – Easily create simple or sophisticated naming conventions required by the client.

Troubleshooting

- **Advanced filtering** – filter tests on any field to reduce the time spent searching.

Support

- **Reduce training time** – The TREND AnyWARE Cloud comes with proactive, step-by-step guidance for all the key features.
- **Team Viewer Live Support** – Using it's built-in Team Viewer server, users can connect to a LanTEK IV-S remotely to troubleshoot failed links, minimizing troubleshooting time, increasing collaboration and reducing call-backs.

Professional reports

- **Customer profiles** – Create a profile for each of the customers with their company logo, address and contact details. This information is automatically pulled through to the reports, saving time.
- **3 Report Formats**
 - **Standard report** – The Standard report combines the Single line and Brief report.
 - **Single line report** – This is a summary report showing multiple tests per page.
 - **Brief report** – This is a comprehensive report with all the measurement results with one page per test.

Professional PDF Report generated by the TREND AnyWARE Cloud

LanTEK III

CERTIFIER FOR COPPER AND FIBER CABLING

The LanTEK III is an easy to use cable certifier that meets existing TIA and ISO/IEC performance requirements for testing up to Cat. 7A/1000MHz.

Download the FREE App today

TREND
AnyWARE
APP

FEATURES

- **Troubleshooting features that save time and money:** Locate hidden connections, splices and cable faults using Time Domain Return Loss (TDRL) and Time Domain Crosstalk (TDX)
- **Share test data:** Provides mobile device connectivity using the USB Wi-Fi adapter and free TREND AnyWARE app
- **Long life battery:** 18 hours continuous use in the field
- **New permanent link adapter saves money:** Reduce down time and lower maintenance costs with field replaceable RJ45 contacts
- **LanTEK III Talk Set:** Talk to a colleague over copper or fiber links
- **Tone generator on both test units:** Ability to identify and trace cables with a compatible amplifier probe (R180001)
- **Autotest on both test units:** Comprehensive test results within seconds. Allows one person testing
- **Rugged design:** Rubberized housing, protected screen and protected measurement port
- **Independently verified:** Accuracy verified by Intertek

Sapphire CARE PLAN

Complete protection for your LanTEK III/IV-S and FiberTEK III/IV

The Sapphire Care Plan is designed to help minimize down time, reduce the cost of ownership and protect against unforeseen repair bills.

Free Annual Calibration – Maintain Accuracy

Free Repairs – Protect Against Unforeseen Bills

Free Loan Unit During Repairs and Calibration – No Downtime

Free Online Training and Technical Support – Improve Efficiency

Free Shipping – Reduce Costs

Free Replaceable Wear Parts – Reduce Cost of Ownership

Every year choose from one of the following options.

- 4 x Permanent Link Adapter Tips (Pair)
- 4 x CAT6A Reference Patch Cord (Single)
- 2 x CAT6A Channel Adapter (Single)
- 1 x LanTEK III/IV-S Battery (Single)

For a full list of optional accessories, please visit our website.

Upgrade Options

Existing customers can
always Depend On Us

Upgrade your existing LanTEK IV to the most powerful and fastest certifier we've ever made with one of the options below.

Option 1

Software and Hardware

New or existing Sapphire Care Plan customers can upgrade to a LanTEK IV-S free of charge.

Option 2

Software and Hardware

Non-Sapphire Care Plan customers can upgrade to a LanTEK IV-S for a small fee including 12 month calibration.

Option 3

Software only

All existing LanTEK IV customers can upgrade to the new 3.0 software Operating System free of charge.

If you're not a Sapphire customer don't worry you can purchase a 1, 2 or 3 year Sapphire Care Plan and receive the free upgrade.

Book your upgrade today!

Terms and conditions apply. Upgrade includes hardware and software updates at one of our Service Centers. For Sapphire Care Plan customers the free upgrade replaces the choice of free accessory in that year.

OTDR II

TIER-2 OPTICAL TIME DOMAIN REFLECTOMETER FOR MULTIMODE AND SINGLE-MODE FIBER CABLING

The handheld OTDR... reinvented

The OTDR II is optimized for multimode and single-mode fiber testing, this fully featured, easy to use, dedicated OTDR with tablet-inspired design is the perfect tool for troubleshooting, certification and everyday field testing in fiber optic networks.

OTDR II

- Includes the intelligent Optical Link Mapper (iOLM), which turns complicated graphs into an easy to read diagram displaying all events along the link with pass/fail status for each event
- Handy, lightweight, powerful, tablet-inspired design
- Wi-Fi for data download
- Event dead zone : 0.5m MM / 0.7m SM
- 7-inch, outdoor-enhanced touchscreen
- 12-hour battery life
- Dynamic range of up to 36 dB in single-mode and 29 dB in multimode
- Professional PDF reporting

Part No.	Kit Contents
R230000	OTDR II - Quad OTDR with IOLM, ICERT (certification to international standards), SC adapters (multimode: SC/UPC, single-mode: SC/APC), visual fault locator, power supply, battery and carrying case
Part no.	Recommended Accessories
R230002	Fiber Inspection Probe (100x, 200x and 400x magnification) , universal 2.5mm adapter tips and soft pouch
R230050	OTDR II - Visual Fault Locator and Power Meter Option for MM and SM , SC adapters
R230051	Fastreporter 2 PC software
SOFT230OTDR	OTDR II trace option

For additional accessories, please visit www.trend-networks.com

FiberMASTER

Why do I need a FiberMASTER?

It depends how important speed and accuracy are to you.

The new FiberMASTER series of fiber optic testers will make it easier and faster to verify, troubleshoot and certify fiber optic cabling.

The OTDR, PON OTDR, Power Meter and Light Source, and Inspection Probe will enable cable installers to get the dependable test results needed, whilst saving thousands of pounds.

As one of the smallest OTDRs in the World you will find them easier to carry and operate whilst the rubberized housing will protect your investment.

The simplified setup options makes them easy to use, saving you time on training and reducing the likelihood of errors.

Our New York Research and Development center of excellence has over 30 years experience designing OTDRs providing you with the most advanced, compact optical test systems available.

FiberMASTER OTDR & Power Meter Light Source

SIZE, SIMPLICITY AND VALUE
WITHOUT COMPROMISE, MADE IN
THE USA, TESTED IN GERMANY.

Test, Troubleshoot and Certify cabling faster with the FiberMASTER OTDR.

The FiberMASTER OTDR is available in 4 options, Quad, multimode, singlemode and PON.

The OTDRs feature both high dynamic range and small dead zones providing the precision required for installation and troubleshooting alike.

FEATURES

- **Accuracy verified by test lab, GHMT** - Distance accuracy verified by German test laboratory, GHMT AG in accordance with the Telcordia GR-196 specifications.
- **Industry leading Dynamic Range** - Test longer fibers, PON systems and maintain accuracy on high-loss fibers
- **Save \$1,000s on testing** - Save more than 50% vs other premium brands.
- **Built to last** - we've surrounded FiberMASTER with a thick rubber housing. Protecting your investment and reducing downtime.
- **Start testing faster** - There is no boot up time or delay. Simply turn on and start testing.
- **Minimal training time** - The touchscreen user interface will guide you through the setup and testing process to reduce potential mistakes as well as saving time in training field technicians.
- **Made in the USA** - We are proud to develop and manufacture our testers in the USA.

Ordering Information / Kit Contents

Part No	Kit Contents
R240-QIP	FiberMASTER Quad OTDR (850/1300/1310/1550) with SC connectors, Inspection port, Power meter
R240-MIPV	FiberMASTER Multimode OTDR (850/1300) with SC connector, Inspection port, Power meter
R240-SIPV	FiberMASTER Single-mode OTDR (1310/1550) with SC connector, Inspection port, Power meter
R240-PIP	FiberMASTER PON OTDR (1310/1550/1625) with SC-APC connectors, Inspection port, Power meter
R240-LSIV	FiberMASTER Quad light source with LC connectors, Inspection port, VFL
R240-PMIV	FiberMASTER Multimode/single-mode power meter with interchangeable LC/SC/FC/ST connectors, Inspection port, VFL
R240-PMLS	FiberMASTER Multimode/single-mode power meter and quad light source kit, with Inspection port, VFL
R240-VIP	FiberMASTER video inspection probe, with auto-centering and zoom feature, compatible with OTDR, light source and power meter. Includes 1.25mm and 2.5mm universal adapters.

For additional accessories, please visit www.trend-networks.com

FiberMASTER Power Meter Light Source

MEASURE ABSOLUTE POWER
AND CALCULATE THE LOSS OF
FIBER OPTIC LINKS AT SEVERAL
WAVELENGTHS.

The TREND FiberMASTER fiber optic testing kit allows the user to measure absolute power and calculate the loss of fiber optic links at several wavelengths. Absolute power measurements are helpful when trouble shooting equipment that may not be operating properly.

The dB calibration feature allows the operator to set a reference level to the light source and directly read the loss of fiber optic links without needing to manually calculate the values.

FEATURES

- Troubleshoot fiber optic network components with optical power meter
- Display power loss in dB using reference function
- Measures fiber optic power in milliwatts (mW) and decibel-milliwatts (dBm) for troubleshooting
- Unique form factor for easy storage of the light source allowing full operation of both light source and power meter

Part No.	Kit Contents
33-928	FiberMASTER MM/SM power meter with 850nm light source only (incl. soft case, manual and cable kit)
33-931	FiberMASTER MM/SM fiber optic test kit (quad light source 850/1300/1310/1550)
Part no.	Recommended Accessories
135051	Male FC (2.5mm) to Female LC (1.25mm) connector allows LC connections to interface with FC devices. Contents: One adapter. Order two pieces when using with FiberMASTER or other optical loss test sets.

VFF5

THE VISUAL FAULT FINDER IS A VISIBLE LASER LIGHT SOURCE USED TO CHECK CONTINUITY, LOCATE BREAKS, POOR MECHANICAL SPLICES AND DAMAGED CONNECTORS IN FIBER OPTIC CABLING.

Used to verify continuity, test and find breaks in fiber links, locate pinched fiber strands in termination cabinets, or anywhere fiber optic cables are terminated and subject to mechanical damage.

The VFF5 is also an excellent aide to technicians terminating mechanical splices or pre-polished connectors where leaking light is an indicator of a poor fiber cleave or other misalignment.

FEATURES

- A hand-held, battery-powered tool, the VFF5 projects a highly visible red light into a fiber optic cable. The VFF5 is used to check continuity of cabling between termination points and to locate bends or breaks in fibers at splicing and termination points
- Useful over a distance of approximately 5km (3.1mi) into multimode fiber and single-mode fiber. Use it as a stand-alone first-line basic troubleshooting tool, or in conjunction with an OTDR to pinpoint faults. Any breaks will be seen as a conspicuously glowing or blinking red light area (in 3mm or smaller cables)
- Equipped with a high-power, day light visible 650nm laser diode which operates either in continuous or flashing mode. The design prevents battery drain due to accidental activation of the tool while inside a tool pouch
- Two AA batteries provide over 30 hours of operation in continuous mode and 80 hours of operation in flashing mode.
- Packaged in a pocket-sized, rugged metal housing and is fitted with 2.5 mm universal connector that accepts ST, SC and FC optical connectors

Part No.	Kit Contents
VFF5	VFF5 - VISUAL FAULT LOCATOR Fiber optic cable continuity tester, fault detector (VFL)
Part No.	Recommended Accessories
33-963-11	Fiber tip pen cleaner to clean 1.25mm connectors and feedthroughs (LC)
33-963-10	Fiber tip pen cleaner to clean 2.5mm connectors and feedthroughs (SC, ST, FC)
135051	Male FC (2.5mm) to Female LC (1.25mm) connector allows LC connections to interface with FC devices. Contents: One adapter. Order two pieces when using with FiberMASTER or other optical loss test sets.

Signaltek

Why do I need a 10G Ethernet Tester?

Problem

LAN networks are at risk of expensive downtime and lost productivity due to the ever-increasing demand of bandwidth hungry services such as video streaming, video conferencing, CCTV cameras and Wi-Fi access points.

Solution

SignalTEK 10G will measure the maximum bandwidth available of the network, identify bottlenecks and discover opportunities to increase bandwidth without replacing expensive data cabling.

SignalTEK 10G

10G ETHERNET TROUBLESHOOTER AND BANDWIDTH TESTER

The new SignalTEK 10G measures the maximum bandwidth of the network cabling up to 10 Gigabits per second. By simulating actual network traffic users can test, troubleshoot and document network and data cable performance up to 10 Gigabit Ethernet standards.

SignalTEK 10G has built-in Wi-Fi connectivity to connect seamlessly to the free AnyWARE Cloud test management system. AnyWARE Cloud offers pre-configuration to eliminate errors on-site, label printer connectivity to save time and “proof of performance” PDF reports for the clients.

FEATURES

- Determine max bandwidth up to 10 Gb/s
- Verify Multi-Gig upgrades on existing cabling
- Pass/Fail to 1/2.5/5/10Gb IEEE standards
- Eliminate PoE guesswork up to 90W
- Copper and fiber interfaces up to 10Gb
- TREND AnyWARE Cloud and PDF reporting
- Label printer connectivity
- Wi-Fi connectivity
- Large touchscreen
- Live remote control

NaviTEK NT

COPPER AND FIBER NETWORK TROUBLESHOOTER

The NaviTEK NT is a network tester for troubleshooting and maintenance of active and passive copper and fiber networks. Incorporating an improved graphical interface NaviTEK NT allows network technicians to pinpoint and solve network connectivity issues faster than ever before.

Subsequently, tests can be saved as PDF reports and shared with colleagues and clients using the free TREND AnyWARE app.

Download the FREE App today

TREND
AnyWARE
APP

FEATURES

- **Port & network summary info:** Press the Autotest button to display summary information and allow for detailed inspection of network parameters
- **VLAN detection & operation:** Automatic detection of VLAN ID's allows the user to configure NaviTEK NT for operation on a VLAN
- **Ethernet utilization:** Real time display of broadcast network traffic shown as a percentage of port speed for the previous 60 minutes
- **CDP/LLDP/EDP port information:** Show port information using Cisco Discovery Protocol (CDP), Link Layer Discovery Protocol (LLDP) and Extreme Discovery Protocol (EDP)
- **Netscan:** Display list of IP and MAC addresses of every device connected to the network
- **Network Probe:** View network illustration to verify test results of each network component

Description is for NaviTEK NT Pro model.

SignalTEK NT

COPPER AND FIBER NETWORK TRANSMISSION TESTER

More than a qualifier

If you install, maintain or troubleshoot data cabling and Ethernet networks, SignalTEK NT allows you to prove the performance up to Gigabit Ethernet transmission rates.

By simulating actual network traffic users are able to test and document network and data cable performance to Gigabit Ethernet standards.

Use the free TREND AnyWARE app to view and send data cable/network test reports to colleagues and clients anywhere.

Download the FREE App today

TREND
AnyWARE
APP

FEATURES

- Network traffic performance test on copper and fiber to IEEE802.3ab standard
- Wiremap test for open, shorts, miswires and split pairs to TIA-568 standard
- Gigabit link verification for copper and fiber cabling
- PoE/PoE+ verification that displays available voltage at device location
- Verify network configuration (device IP/gateway address/subnet mask)
- Switch port identification via LLDP/CDP protocols
- Distance to fault using TDR technology (copper only)
- Ability to identify and trace cables with a compatible amplifier probe (R180001)
- Optical power indication (with compatible SFP modules)
- Stress test network before installing bandwidth hungry devices
- Port blink to visually trace cable from work area outlet to network switch
- Displays port ID of LLDP/CDP enabled switches to eliminate manual cable tracing

Part No.	Kit Contents
R156005	SignalTEK NT – Network Transmission Tester. Includes 1 x display with touchscreen, 1 x remote, 2 x NiMH batteries, 2 x patch cables - 30cm, Cat 5e STP, 2 x power supply with EU/UK/US adapters, 1 x USB Wi-Fi adapter, 1 x quick reference guide, 1 x carry case
Part No.	Recommended Accessories
R180001	TREND amplifier probe

LanXPLOER Pro

NETWORK TROUBLESHOOTER WITH BANDWIDTH MONITORING AND PERFORMANCE DIAGNOSTICS

LanXPLOER Pro is an In-Line tester for diagnosing problems in active and passive networks. Capabilities include troubleshooting for Ethernet connectivity and identifying faults in copper cables. Networks can be accessed through copper, fiber and Wi-Fi interfaces.

Download the FREE App today

TREND
AnyWARE
APP

FEATURES

- The unique In-Line feature allows you to monitor network traffic between two devices to diagnose low level Ethernet issues that cannot be detected by either a PC or a managed switch
- See your top 10 device downloaders and uploaders on the network to help troubleshooting
- Supports IPv4 and IPv6
- Touch screen for easy data entry
- Performs a scan of your the entire network including printers, servers and PCs. Then rescan and check any changes which is useful for IT audits and troubleshooting
- Provides a comprehensive analysis on layer 1 (physical cable), layer 2 (data), layer 3 (IP) as well as layer 4 and above
- Field replaceable RJ45 contacts eliminate downtime from worn or damaged connectors
- Monitoring VoIP calls and the Quality of Service (QoS) including Real Time Transport Protocol (RTP) and jitter
- Detection of PoE and PoE+ with voltage, current and power measurements to discover any power supply issues. In-Line mode allows you to measure the consumption of your PoE devices

Part No.	Kit Contents
R150001	LanXPLOER Pro - In-line Network Troubleshooter 1 x LanXPLOER Pro test unit, 1 x remote unit #1, 1 x 2.4/5GHz Wi-Fi antenna, 1 x TREND amplifier probe R180001, 1 x power module (rechargeable), 1 x mains PSU/charger, 2 x 30cm RJ45 cable, 1 x USB Wi-Fi adapter, 1 x quick reference guide (English), 1 x carrying case

SecuriTEST IP

CCTV CAMERA TESTER FOR IP
DIGITAL / HD COAX / ANALOGUE
SYSTEMS

Camera Configuration, Installation and Troubleshooting

SecuriTEST IP is an installation and troubleshooting tester for digital/IP, HD coax and analogue CCTV camera systems. With a single tester that can power, configure and document, SecuriTEST IP increases productivity from start to finish.

Supply power to cameras via PoE/PoE+ (Power over Ethernet) or standard 12V DC power using its internal Li-Ion battery, eliminating the need for external power adapters and injectors.

The QuickIP™ feature allows installers who are new to IP camera systems to quickly and easily connect to cameras without being network experts.

FEATURES

- Connect to various cameras using RJ45, Wi-Fi or BNC ports
- Power the camera with 12V from the Li-Ion battery or PoE/PoE+
- Faster camera login using the unique QuickIP™ function
- Comprehensive camera setup with aim, focus, PTZ, presets and network settings
- Provide proof of installation with PDF reports that show camera parameters and multiple video screen-shots
- Eliminate guess work with data cable and network troubleshooting tools

Part No.	Kit Contents
R171000	SecuriTEST IP Digital/Analogue/HD Coax CCTV Tester. 1 x SecuriTEST IP Camera Tester, 1 x carry case, 2 x neck straps, 1 x PSU EU/UK/US/AU adapters, 1 x cable tracer/remote, 1 x 3m Cat. 5e UTP patch cable, 1 x 3m coax cable with two end BNC (m) connectors, 1 x 3m DC12V 3.5(f) to 2.5(f) power cable, 2 x RS485 female green plugs, 1 x 0.5m RS485 cable with female green plug and two clips, 1 x 0.5m audio male jack with other end two clips, 1 x quick reference guide, 1 x 8GB microSD card and reader with USB adapter

Part No.	Accessories
R171050	1 x Replacement Cable Tracer/Remote
R171051	1 x Replacement accessory set for SecuriTEST IP. 1 x coax cable with two end BNC (m) connectors, 1 x DC12V 3.5(f) to 2.5(f) power cable, 2 x RS485 female green plug
R171052	1 x Replacement Battery

NaviTEK IE

COPPER AND FIBER TROUBLESHOOTER FOR PROFINET INDUSTRIAL ETHERNET NETWORKS

The NaviTEK IE is a tester for commissioning, preventative maintenance and troubleshooting of PROFINET Industrial Ethernet networks as well standard Ethernet IP networks.

Designed to simplify the process, the NaviTEK IE identifies network nodes and configuration without requiring a PC and specialty software. An easy to understand system health check pinpoints potential issues before they become network failures. Automatically discover cable, network or device configuration/faults with the touch of a button. To prove the network has been commissioned successfully, NaviTEK IE provides professional PDF reports that can be shared with colleagues and clients using the free TREND AnyWare™ mobile app.

Download the FREE App today

TREND
AnyWARE
APP

FEATURES

- Pinpoint cable faults on copper and fiber cabling
- Easily configure nodes to resolve connectivity issues
- Prevent network failures with the health check feature
- Locate hard to find devices using the device blink feature
- Find mis-configured devices using the NetMAP comparison tool
- Find rogue devices using the 48 hour event log
- Create professional PDF reports for your clients
- Send reports anywhere using the free TREND AnyWARE app

Part No.	Kit Contents
R151010	NaviTEK IE - Industrial Ethernet Tester 1 x NaviTEK IE test unit, 1 x Remote unit No. 1, 1 x Rechargeable Power Module, 1 x PSU EU/UK/US adapters, 2 x Patch cables - 30cm, Cat. 5e STP, 1 x USB Wi-Fi adapter, 1 x Quick reference guide, 1 x Carry case, 2 x PROFINET RJ45 (m) - M12 (f) D coded 1m adapter cable (R151058)
Part No.	Description
R151058	2 x PROFINET RJ45 (m) - M12 (f) D coded 1m adapter cable
R151059	2 x PROFINET RJ45 (m) - M12 (f) X coded 1m adapter cable
R151060	1 x 100Base-Fx SFP housing Media Converter

Tone & Probe

LOCATE CABLES FAST

Don't hope for the best, **depend** on our Tone & Probe to easily trace all types of copper cables. Our industry leading power output provides cable tracing you can depend on, even over long distances. Find cabling fast using the visual signal indicator and powerful speaker combination.

The tone generator is equipped with comprehensive line testing features for troubleshooting and service verification.

The tone and probe set creates the perfect team to accurately identify data cable pairing using its multiple tone pattern feature.

FEATURES

AMPLIFIER PROBE

- Locate weak signals using the highly sensitivity probe
- Easier cable tracing with both audible and visual indicators
- Find cables in noisy environments using the earphone jack
- Operates in dark areas using the LED torch
- Compatible with LanTEK IV-S, III & II, LanXPLOER Pro, SignalTEK, NaviTEK, PoE PRO & VDV II
- 9 volt battery included

TONE GENERATOR

- Provides four functions: tone generation, continuity testing, talk battery and line polarity confirmation
- Trace longer cables using the industry leading power output.
- Solve issues faster with power supply for external talk sets.
- Verify cabling with polarity and continuity.
- Easy to use and requires no training.
- 9 volt battery included

Part No	Kit Contents
R180000	Tone & Probe Kit 1 x Amplifier Probe, 1x Tone Generator, 1 x RJ45 to RJ11 cable, 1 x Crocodile to RJ45 Patch Cord, 1 x carry case, 2 x carry strap, 1 x Probe user guide, 1 x Tone Generator user guide
R180001	Probe 1 x Amplifier Probe, 1 x carry strap, 1 x user guide
R180002	Tone Generator 1x Tone Generator, 1 x RJ45 to RJ11 patch cord, 1 x Crocodile to RJ45 Patch Cord, 1 x carry strap, 1 x user guide
R180050	1 x Probe Tip
R180051	1 x RJ45 to RJ11 cable, 1 x RJ45 to Crocodile clips cable
R180052	1 x RJ45 to insulation piercing alligator clips
